# Canine Daily Food Portion Calculator

Use this worksheet in conjuction with *Daily Canine Diet Guidelines Based on 10 lbs of Body Weight*.

*To get the proper portion for your dog, divide your dog's weight by 10, and then multiply each portion on **Daily Canine Diet Guidelines** by that number. Example: If your dog weighs 50lbs, divide by 10 to get 5. Multiple all portions by 5. Example for meat: (.75 cups) x (5) = 3.75 cups per day of meat for your 50lb dog.*

Enter your dog's ideal weight: _____  ÷ 10 = _____
*weight factor*

|  | *weight factor* | | *Your dog's DAILY portion* |
|---|---|---|---|
| **Meat:** (.75 cup) x | _____ | = | _____ |
| **Veggies:** (.25 cup) x | _____ | = | _____ |
| **Fruit:** (.125 cup) x | _____ | = | _____ |

## Weekly Super Nutrients

|  | *weight factor* | *weekly feeding factor* | | *Your dog's WEEKLY portion* |
|---|---|---|---|---|
| **Egg:** (.5 egg) x | _____ | x2 | = | _____ |
| **Organ:** (2 tbsp) x | _____ | x3 | = | _____ |
| **Fish:** (4 tbsp) x | _____ | x2 | = | _____ |

tbsp = tablespoon
1 cup = 16 tbsp
1/2 cup = 8 tbsp
